

| Course Title | In-plant Training | | | Course Code | BST 42528 | | |
|--------------|-------------------|----------|---|-------------|-----------|---------------------------|---|
| Year | 4 | Semester | 2 | Credits | 08 | Theory (hr) | - |
| | | | | | | Practical (hr) | - |
| | | | | | | Independent Learning (hr) | - |

Aim of the Course:

To provide an opportunity to integrate all the learning in a real life environment and to experience and understand the real world of work environment in order to make the student a “ready to work” graduate

Intended Learning Outcomes:

On the successful completion of the course, the learner should be able to:

- Explain the administrative and technical processes as applicable to a specific industry / organization.
- Critically report the strengths and weaknesses, and room for development, of the administrative and technical process of a given industrial/services sector.
- Comment on the essentials of operations, the way of running a business, use of tools, techniques and equipment, and protocols of health, safety and environment.

The duration of the in-plant training is six month. The students will be attached to an industrial training on full time basis in the 2nd Semester of the 4th Year. During this time, student will be undergoing training in the industry or commercial organization relevant to their areas of interest for future employment. This training will enable to the students to gain knowledge and hands on experience, develop skills, and to build up confidence to handle, maintain, and manage operational systems in the selected professional area.
